The Move a Plan to Get the Lumber Company's Affairs in the Hands of Old Owners.

The Norfolk Presbytery to-day heard further argument in the case of the Colley Memorial Church, against one of its most prominent members, Edward Camp, a manufacturer. It alleges that he has not attended services regularly since the return of Rev. R. A. the concern are stockholders as well as reeditors for sums advanced the company. They are of the Tunis family, which has little or nothing to do with the concern since it emerged from the hands of the receivers.

It is well understood in local financial and lumber circles that the arrangement under which the company, which is capitalized at a million dollars, came out of the hands of receivers and the reorganization was not in all respects satisfactory to the men who had built up the plant to its present immense proportions. Therefore, it is apparent to the discerning that the return of the plant to the hands of receivers, H. B. Nichols, Theopolus Tunis and E. H. Thompson, the latter of Baltimore, is an effort to get the property again into the hands of its founders, who, through the plaintiffs, Mrs. Margaret Wilson and Mrs. Bessie Wilson, Tunis, allege that the manage-

It is generally believed that a clash between the State and Federal authority is likely to occur—in fact, that, it is well night inevitable in the case of the Virginia Pilots' Association, shortly to come before the Supreme Court of the United States at Washington;

The action involves the very essence of the constitutionality of the compulsory pilotage acts of the State of Virginia, which have been upheld by its local courts whereves tried.

The very life of the Pilots' Association is dependent upon the decision, for the law is the only bulwark the association has against the possible action of masters of vessels bringing in their own

masters of vessels bringing in their own craft without the aid of a pilot.

As the matter stands, whether this is done or not, the vessel is liable for pilotago fees. It is the fight of the vessel owners against this construction of the law that will bring the case to the Supreme Court.

Counsel for the vessel owners declare that the first time a Federal court is called upon to decide the question at issue it will determine that no State has right to pass a law giving any man or

the association. The aggregate of these claims is tremendous.

Capinin R. C. Marshall, of Portsmouth, and Judge D. Tucker Brooks, of Norfolk, represent the Pilots' Association, and Mr. Robert M. Hughes, of Norfolk, the vessel owners. All three gentlemen have qualified to practice in the Supreme Court of the United States, and the final test of the law will be made without undue delay.

FORTUNE-TELLER JONES KILLED BY OFFICER

(Special to The Times-Dispatch.)
NEWPORT NEWS, VA., March 7.—Silas
Jones, alias "Fortune Teller," was shot
and killed to-day while attempting to escape from officer "Hank" Smith, who had
him under arrest.

The police have been looking for Jones
for the past week. Jones was released
from the penitentiary about ten days
ago, where he had served three years
for window smashing and robbery. During the time he has been out of jail three
burglaries have been committed, which
the police claim to have traced to the
negro killed by Officer Smith.

that the first time a Federal court is called upon to decide the question at issue it will determine that no State has a right to pass a law giving any man or organization a right to assess charges for services which they never rendered.

The pilots maintain that this phase of the law merely penalizes those who fall to take the precaution of having a pilot aboard, and that it is intended to act as a fine for their failure to comply with the law, which says it shall be essential for them to carry one. A pilot, they hold, is as necessary to a boat's safety as any mechanical appliance installed aboard for that purpose.

If the case goes against the pilots, it will knock out a large number of suits entered by them to enforce the collection of fees against various vessels falling to accept the services of the members of (Special to The Times-Dispatch.)

SERIOUS FIRE AT

Laundry Burns, With All Machinery-Horse and Buggy Also Destroyed.

SOUTH BOSTON

(Special to The Times-Dispatch.) SOUTH BOSTON, VA., March 7.-About 6 o'clock Sunday morning the fire alarm was turned in, and in a few mo-ments the South Roston Steam Laundry, near Main Street, was seen to be in flames. The fire department responded promptly, and but for their timely action the huge lumber building in the rear of the large tobacco prizery in the right wing, with millions of pounds of tobacco packed away belonging to W. A. Willingham and Company, would have been consumed by the mad flames. The laundry is almost a total wreck, with no insurance on the building. The machinery was greatly damaged, and insured for \$400. The losses caused by fire are estimated at \$700. The laundry was an old frame building, which was among the first houses crected in South Boston, it being the first Methodist Church built at this place. Here it was that every denomination of the town used to assemble for worship. The building and machinery were owned by W. H. Shepherd, but was two years ago rented to E. N. Black to establish a laundry.

Mr. Black had the misfortune to lose his pet horse, buggy, wagon and a great deal of laundry supplies, with no insurance. The fire is thought to have originated in the warehouse stalls in the rear of the laundry, and was no doubt the work of an incendiary.

VIRGINIA AT ST. LOUIS.

Remarkable Exhibit for Exhibition From Henrico County.

tion From Henrico County.

(Special to The Times-Dispatch.)

MARTINSVILLE, VA., March 7.—Probably one of the most interesting, as well as instructive, exhibits that will be seen at St. Louis during the World's Fair will be the "Old Virginia Homestead." This exhibit will be made by three of enterprising citizens, Messrs. T. H. Self, R. W. Blair and J. C. Greer. The exhibit will consist of an old log crbin, built in Henry county in 1803, which will be shipped to St. Louis and rebuilt on the fair ground; just as it appeared a hundred years ago. or, in other words, it will be a reproduction of an old Virginia, home just as it appeared a 'century ago, presided over some years later by Mrs. Nancy Self, of Henry county, who is now in her innety-sixth year. She is in perfect health, active, and has more energy than many women fifty years her junior. Mrs. Self has lived during the life of every President, except that of George Washington, and can now boast of five generations. The oldest of her great-grantgrandchildren is now in her thirteenth year, with merriest look and health. The old lady may live to see the sixth-generation before she crosses to the other shore. Mrs. Self is the last of her generation, and sill thinks that machine-made goods are good enough only for those who do not know how to make such things by

before mechinery was invented to do this work.

Mrs. Self will bring with her the loom upon which for years she has abored to keep her children and grandchildren, some of whom were soldlers, supplied with shirts and clothing. The spinning-wheel and cards which she used in those trying times will be in daily use during the exhibition. She raised flax, which she uses in preparing summer garments. This old antiquated mode of making flax into cloth will also be seen and exhibited. Besides this, the old cabin will contain many relice from one to three hundred years old.

But the most striking feature of this truly remarkable woman is her indominable energy, her incessant labor, even at her advanced age, and the kindliness of her disposition to teach the young how to make life a success.

She belongs to the primitive Baptist Church, and in politics is a Democrat—all of her descendants are.
